Thompson Machine	ISIS-45 w/RBA	45ACP .578-28 threads *	\$625.00	1
Thunder Beast Arms	223CB	223/5.56 all titanium 1/2 x 28 compact break	\$695.00	1
Yankee Hill Manufacturing	Phantom TI QD	.308/7.62 quick attach flashhider 5/8 x 24 threads Titanium	\$875.00	1

A few quick notes I want to add.

If it does not have threads listed, the adapter and/or piston is sold separately. Liberty, Silencerco and Dead Air Ghost specifically.

Silencerco sells all pistol caliber cans without a piston. I include one in the price. Additional pistons are \$75 each.

Silencerco 5.56 suppressors come with flash hiders. 7.62 suppressors come with muzzle breaks. They make both types for both calibers.

Hybrid suppressors have a fixed barrel adapter, and no piston. Omegas have a muzzle break and fixed barrel adapter.

Here's the fun part:

Hybrid, Omega and Harvester Big Bore have interchangeable attachment devices. Omega and Hybrid have the same endcap.

You can put an ASR mount on a Harvester Big Bore, or Hybrid, and mount it to the Omega Trifecta Muzzle break.

This is the same Trifecta mount as the Specwar 5.56 and 7.62.

Octane 9 and 45 fixed barrel adapters fit the Hybrid.

Octane 9 and 45 fixed barrel adapters also fit the Harvester.

Have any questions, just let us know and we can probably answer it.

THANKS!
